FOR IMMEDIATE RELEASE

Milton CAT Completes Certification to The International Standard, ISO9001: 2015 Quality System

Milford, MA, March 2, 2018 - Milton CAT, Power Systems Division is pleased to announce their certification to the International Standard, ISO9001:2015 quality system. Milton CAT is the only Caterpillar Dealer in North America with this certification.

This certification provides assurance to our customers that we are focused on continual improvement and customer satisfaction and provides confidence that Milton CAT is dedicated to:

- Standardized product
- Standardized processes
- Continual improvement
- Rigorous subcontractor auditing

First certified in 1999, Milton CAT, Power Systems Division is audited every year and must be recertified every three years to the current ISO standard. If the standard has changed, Milton CAT must evaluate its existing procedures and align them with the new standard requirements and business systems. Major changes to the quality system and overall processes were made to meet the new ISO9001: 2015 standard which include extensive process mapping and merging business system processes with the new quality standard. This is Milton CAT's third recertification to a new standard.
